## EDUCATION

**Washington University in St. Louis**  
*B.S. in Computer Science*

St. Louis, MO  
Aug 2024 – May 2028

## EXPERIENCE

**Student Life (Studlife Newspaper)**

St. Louis, MO  
Jan 2026 – Present

*Web Development Lead*

- Manage and maintain the newspaper's website, which uses WordPress and custom PHP scripts
- Collaborate on a UI redesign to modernize site layout and improve user experience
- Implement updates and troubleshoot backend functionality to ensure smooth content publishing

**JukeHouse Music Publishing**

St. Louis, MO

*Lead Software Engineer*

Jul 2025 – Present

- Leading the development of a music publishing administration platform that helps songwriters collect royalties globally
- Building a full-stack system using Django and PostgreSQL to support worldwide music administration
- Designing database schemas and REST APIs to integrate with collection societies and digital service providers

**Habitat Financial**

St. Louis, MO

*Software Development Intern*

May 2025 – Aug 2025

- Developed full-stack features using Django, PostgreSQL, HTMX, and JavaScript for royalty processing
- Built interfaces for album and artist management, revenue tracking, and financial reporting
- Implemented data pipelines to handle complex royalty calculations across regions

**Bliss Salon of Glenview**

Glenview, IL

*Freelance Web Developer*

Apr 2025 – May 2025

- Designed and deployed a responsive salon website using React, Vite, and SCSS
- Handled SEO setup and production deployment including DNS and SSL configuration

## PROJECTS

**Trellofy** | *MongoDB, Express.js, React, Node.js, AWS (EC2)*

Dec 2025

- Built a full-stack Kanban board application for creating boards, organizing tasks, and tracking progress
- Implemented drag-and-drop interactions for moving task cards between lists
- Designed persistent data storage using MongoDB

**Multi-Room Chat Server** | *Node.js, Socket.io, AWS (EC2)*

Nov 2025

- Developed a real-time chat application supporting multiple rooms and live messaging
- Used Socket.io to enable bidirectional communication without page reloads

**NutriScan** | *Streamlit, Python, OpenAI API, Foodvisor API*

Oct 2024

- Built an application that analyzes food images to estimate nutritional content during a 24-hour hackathon
- Integrated OpenAI and Foodvisor APIs to generate personalized nutrition suggestions
